Technical Skills

Languages: Dart, JavaScript

Frameworks & libraries: Flutter, Node.js, Express.js, Nest.js

Databases: MongoDB, PostgreSQL, Firebase (Firestore, Realtime Database)

Development Tools: Git, GitHub, Postman, VS Code, Android Studio

Other Skills: State Management (Provider, Riverpod, BLoC/Cubit), Clean Architecture, RESTful API Development, Authentication (JWT, OAuth2, Firebase Auth), Agile/Scrum Methodology, Real-time Data Sync, Cross-Platform Development

Experience

Trainee Flutter Developer

Supreme IT Solutions | Kathmandu, Nepal

December 2025 – April 2026

- Built cross-platform mobile features using Flutter with clean architecture and BLoC/Cubit state management, integrating RESTful APIs for a client-facing business management application delivered across sprint cycles.
- Contributed to 3+ client projects in an Agile/Scrum team, collaborating via Git workflows and code reviews to ship production-ready features while maintaining code quality standards.
- Implemented JWT authentication and RESTful API integration using the Dio HTTP client, strengthening the app's security layer and data-fetching reliability across Flutter screens.

Projects

E-Learning Platform

Personal Project | Flutter, Node.js, MongoDB, Riverpod, Stripe, Firebase FCM

August 2025

- Architected a full-stack e-learning platform with 5+ course categories, advanced filtering, progress tracking, and automated PDF certificate generation upon completion.
- Engineered scalable RESTful APIs with Node.js/Express.js and MongoDB for enrollment and progress tracking; integrated Stripe payment gateway for secure payment processing.
- Implemented Riverpod state management, Firebase FCM notifications, and Dio HTTP client with optimistic pagination for smooth performance across large course catalogs.

Job Portal Application

Personal Project | Flutter, Node.js, MongoDB, Provider, Push Notifications

January 2025 – March 2025

- Built a full-stack job search platform with category/location filtering, one-tap applications, and real-time Firebase FCM push notifications for new job alerts.
- Architected scalable Node.js/MongoDB backend with optimized indexing, reducing search query response time across job listings and application tracking modules.
- Implemented Provider state management with clean architecture, delivering a responsive cross-platform UI on iOS and Android with real-time application status updates.

Food Delivery Application

Personal Project | Flutter, Node.js, Express.js, MongoDB, Firebase

August 2024 – December 2024

- Delivered a complete food delivery platform with browse, search, cart, and secure checkout — backed by JWT-based user authentication.
- Built scalable RESTful APIs with Node.js/Express.js and MongoDB covering order processing, dynamic promo/discount engine, and ratings system with a modular architecture.
- Implemented real-time order status updates and push notifications using Firebase Cloud Messaging (FCM), enabling users to receive instant updates throughout the order workflow.

Education

Birendra Multiple Campus | Tribhuvan University

2022 – Present

Bachelor of Science in Computer Science and Information Technology

Bharatpur, Chitwan
